

Neurobiology: Mechanisms & Advanced Approaches

at the Marine Biological Laboratory

June 1 - July 13, 2024

Applications due:

Jan. 3, 2024

**Financial
Assistance
Available**

Go Deep.

MBL's iconic Neurobiology course teaches concepts and methodology at the forefront of modern cellular and molecular neuroscience. By carrying out real research projects, participants are empowered to formulate rigorous experiments to address scientific questions that push the boundaries of modern neuroscience.

Course Directors:
Ricardo Araneda (Univ. of Maryland)
Michael Hoppa (Dartmouth)
Rebecca Piskorowski (INSERM Fr)
